PROFESSIONAL SUMMARY

Personal Statement: Strategic Supply Chain Professional seeking positions in Integrated Planning & Business Operations. Experience in scaling supply chains in startup / high growth environments delivering value & productivity

☛ Strong attention to detail with problem-solving skills in Consumer Hardware & Network Infrastructure programs
☛ End-to-End Forecasting to fulfillment expertise synchronizing (demand/Supply, Procurement, Logistics, Fulfillment)
☛ Cross-Functional Expertise working within & Across Techno-functional teams driving efficiency in value chains

Core Competencies:

- Product Operations (NPI, Sustaining, Refurb)
- Integrated Planning (CPFR, S&OP, IBP, COGS)
- Advanced Demand Forecasting & Analytics
- Analytics (ETL, Data Modelling, Visualization)
- Optimization (Inventory, Procurement, Transportation)
- OKR/KPI Reporting (Scenario, Trend, Risk, Strategy)
- Fulfillment (Service level, Allocation, POS, SFDC)
- SCO (MRP, MPS, DRP - Tooling & Integrations)

PROFESSIONAL SKILLS DEMONSTRATED

Sr. Demand Planning & SIOP at Tarana Wireless **2022 – Current**

- Owned Consolidated Revenue forecast Signal for Systems, Accessories, Modules (Long Range, 30%YOY Growth)
- Led & Facilitated Monthly Sales & Operations (S&OP) Process synchronizing with internal & external stakeholders to deliver profitability, forecast accuracy, revenue targets & inventory targets for all stakeholders.
- Built & Maintained SKU-Level (5K Parts, 12 FG Config., 20 accessories Kits) demand forecasts based on historical data, promotions, Q-end revenue targets
- Drove forecast development strategies for global demand sources adapting to changing business and product releases using large volumes of detailed item level data synchronizing supply & customer demand
- Played Techno-Functional Role delivering S&OP Process & standardized reporting using Vena Planning Models (Revenue, COGS, Install Base, Repair Operations, Components, SCM Projections)
- Aligned with Sourcing & Supply Chain execution directly with program milestones, ensuring hardware & components are delivered on time to enable validations, pilots & scalable strategies with tier 1 customers.
- Implemented Key Developments in Oracle NS - MRP, MPS, Inventory Automations, EDI Enablement, Right sizing
- **Projects –** Demand Planning, Forecasting Analytics, IBP Data Integration, S&OP Process, Cost Optimization

Supply Planning Engineer at Google Fiber **2019 – 2022**

- Managed Supply Chain Operations for demand and supply positioning as per market capacity requirements.
- Proactively managed forecast and inventory flows to mitigate potential EOL inventory issues and short shipments
- Collaborated with SCO/Planning Team to drive system improvements and user adoption for Inventory/Demand/ERP Applications and reporting tools (Oracle to SAP, Big query, Salesforce)
- Managed quarterly Physical Inventory, Cycle counting and daily reconciliations of perpetual inventory to GL for all locations. Improved API from 90% to 99.2% within 1 year
- Provided sourcing support related to supplier selection, costs metrics & onboarding, procurement for accessories and packaging material across multiple product lines. (RFQ, Alternate supplier selection & sourcing)
- Created analytical dashboards to monitor significant variances between weekly installments, sales forecast and fulfillment operations to support build plans, kitting at warehouse.
- End-to-End POS testing through ERP & Salesforce CRM for Order Types & Fulfillment types meeting testing KPI's
- **Projects** – Inventory Management, Procurement & Sourcing, Fulfilment Operations, Business systems

Global Supply Chain Analyst at Apple Inc (Via PDS Tech) **2017 – 2019**

- Analyzed service parts supply/demand, make new buy, repair recommendations to achieve target fill rate & backlog
- Communicated supply shortages, risk & opportunities based on changing business needs & priorities
- Reviewed daily reports and act on supply shortages immediately to minimize customer impact (Risk Analysis)

- Supported Program Managers, Supply Planning, maintain Component SKU's for (CPRF Supply Planning team)
- Reviewed and updated planning factors (Safety Stock, Lead-time, Lot Sizing) for actionable plan on supply shortages
- Prepared Yield analytics tool to monitor sustaining products supply position required for refurb operations
- Performed Ad-Hoc analysis on inbound fulfillment (Distribution center to B2b / B2C deliveries / KPI Reporting)
- Utilized BI Tools to run queries and analyzed data for hardware components of over 200 SKU's, to ensure supply/demand balancing, material receipts (Queries – Performance analysis. Fill rate, logistics/kitting sequencing)
- Conducted performance and quality meetings to discuss areas of improvement and create risk mitigation Daily basis
- Enabled merchants to improve overall Fill rate optimizing inventory (78 to 88%), POP (90 to 95%), GMV (5% growth)
- **Projects**: Global Logistics and distribution (Anaplan / Tableau), Inventory Analysis & Fill Rate Optimization (SQL)

Pursued Masters in supply chain strategy gaining educational & internship training during (2015-2017)

Manufacturing Planning Engineer at Mark Enterprises **2014 – 2015**

- Partnered with Plant operations to optimize production schedules, manage capacity, per customer allocations
- Ran daily/weekly production reports (CTB) & Project scheduling for 8- Direct Customers & ensuring Delivery targets
- Managed 625K Inventory on Indirect procurement providing visibility to operations target work orders
- Delivered & Improved MRP reports & product commits as per capacity constraints on production line.

EDUCATION & INTERNSHIPS

Masters in Industrial Engineering & Management, Oklahoma State University **2017**

- **Specialization**: Supply Chain Strategy, Network Optimization, Analytics, Project Mgmt.
- **Internships**:
  - ***Amazon*** *– Operations improvement project and fill rate optimization – White Paper*
  - ***ICT*** *– Entrepreneurship intern for startup learning business plan, product market fit, research*

Bachelors in Production Engineering, University of Pune **2014**

- **Specialization**: Industrial Engineering (Finance, Production, Manufacturing & Control)
- **Internships**:
  - ***Volkswagen India*** *– Inbound logistics, Ramp up support for POLO GT, Vento Car model releases*
  - ***TATA Motors*** *– NPI Design and development of automated car parking system*

TECHNICAL SKILLS / CERTIFICATIONS

Certifications	- **APICS**: Production and Inventory Management (BSCM, MRP, MPS) - **IISE** Certified **Lean- Six Sigma Green Belt** - **SAP Certified** – End to End Business Processes for intelligent enterprise - **Scrum** Product Owner Certification: PSPO 1 – In Progress - **Aws Certified** - Data Analytics, Modelling, ETL Pipelines, OLAP
Accomplishment	- Pune University **Rank Holder*** (2012, 2014), Full Scholarship
